

Setting up Apple TV on SBU's campus

Apple TV allows you to play content from your Apple device (iPhone, iPad, iPod, Mac...) on your high-definition television. This includes pictures, music, videos, movies and more. Plus, you can access subscriptions such as Netflix, Hulu Plus, YouTube, HBO Go, Showtime, Watch ESPN and more.

We highly suggest protecting your Apple TV network with a password.

How to set it up:

- 1) Plug in the Apple TV to your HD television using your personal HDMI cord.
- 2) Plug in your Apple TV to an outlet, using the power cord that came with your Apple TV.
- 3) Be sure that your input on your television is set to the appropriate setting (Input, HDMI 1, HDMI 2...)
- 4) Connect your personal device to the SBU WiFi.
- 5) Then, using your Apple TV remote, connect the Apple TV to the SBU WiFi.
- 6) Enter your Apple ID and password.
- 7) Your Apple TV should begin to configure and when it's complete, Apple TV is ready to use.
